# Instructions

## Helpful hints for clay usage:

- Keep away from eyes. If material accidentally enters the eye, rinse well with plenty of clean water.
- Wash hands after use.
- Store unused clay in an airtight container.
- Keep finished products away from open flames.
- Do not put the clay in an oven, microwave, or kiln.
- Clay may take up to 24 hours to dry.
- Experiment with mixing colors to make your colorful creations.

## Helpful hints for painting:

- Protect your work area with newspaper.
- Stir paint tubs thoroughly before painting.
- Add a drop or two of water if the paint is too thick.
- Wait for each color to dry before adding the next color.
- Clean your brush with water between using different colors of paint.
- Experiment with mixing colors to create unique new color combinations.
- When mixing colors, do not mix in the paint pot.
- Mix on a paper plate or piece of plastic wrap to keep your work space clean.
- Acrylic paint can be cleaned up with soap and water, but it can stain clothes.

Thoroughly dry pieces of clay may be painted with tempera or acrylic paint.
